ABUNDANT AI SYSTEMS

PLAYBOOK

Foundation for Google and AI Search

Your Setup Guide

Get your website, Google Business Profile, Search Console, and social profiles set up with Claude Code. About 30 to 60 minutes.

Abundant AI Systems

What you're getting

A free guided setup. An AI assistant coaches you through each one, step by step, in plain English.

1

Website and domain

Your own web address, like yourbusiness.com, and a simple website that loads on it.

2

Search Console

A free Google tool that shows how people find your website.

3

Google Business Profile

Your listing on Google Search and Maps, with your hours, phone, and photos.

4

Social profiles

Facebook, Instagram, and similar pages that match your business.

Before you start

- A computer
- The Claude Code app (needs a paid Claude plan)
- About 30 to 60 minutes

Three steps

That's all it takes to get started.

1

Get the Claude Code app

Go to **claude.com/download**, download the Claude app, and sign in with your paid Claude plan. Open the **Code** tab.

2

Paste the setup box

Copy the box on the next page, paste it into Claude Code, and press Enter.

3

Answer its questions

Claude asks about your business, one question at a time. Answer in your own words. You can stop any time and pick up later.

TIP

If it asks permission to install something, click **Allow**.

IMPORTANT

Never type your passwords into the chat. Claude will never ask for them.

The setup box

Select everything in the box, copy it, and paste it into Claude Code.

PASTE THIS INTO CLAUDE CODE Select all, copy, paste

```
Please download the Foundation for Google and AI Search from
https://github.com/Abundant-Ai-Systems/Small-Business-Setup-Kit into
my Documents folder, then open it and follow the instructions in
ONBOARDING.md. Ask me one question at a time, explain every step in
plain English, and never ask me for any passwords.
```

The kit lives here: **github.com/Abundant-Ai-Systems/Small-Business-Setup-Kit**

How to copy it: click at the start of the first line, hold down the mouse button, drag to the end of the last line, then press **Cmd + C** on a Mac or **Ctrl + C** on Windows. In Claude Code, click the message box, press **Cmd + V** (Mac) or **Ctrl + V** (Windows), then press Enter.

Once it's running

Here is what you'll see, from start to finish.

1. **It gets to know your business**
   What you do, where you work, and whether customers visit you or you travel to them.

2. **It asks: yes, no, or not sure**
   For each item: "Do you have this set up?" If you're not sure, it shows you a quick way to check.

3. **It builds your checklist**
   A short list of what's missing, so you only do what you need.

4. **It walks you through one step at a time**
   It only moves on when you say "done".

5. **Last step: add us as manager**
   At the end, you invite Abundant AI Systems as a manager. Your choice, and you can remove us any time.

You stay in control

You create and verify your own accounts. Google requires it, and it keeps your accounts yours. Claude only coaches: it tells you what to click and what you should see.

PAGE 6

Want us to manage it for you?

If you'd rather have a team keep your online presence up to date, we can help. Finish the kit, add us as a manager, and we'll take it from there, so you can get back to running your business.
